BILINGUAL DICTIONARIES ITALIAN/HORSE – HORSE/ITALIAN 160 words to speak HORSE fluently

What colours can horses see? How has our relationship with this animal evolved in time? Is it possible to ride horses in a way that fosters their well-being? How do horses express their affection? Why do habits like eating horse meat and traditions like the Palio horse race still exist?

The dictionary answers these questions and helps us imagine a future in which horses may have a better quality of life as well as a **trust-based relationship with humans**. This dictionary is divided into **three parts**, that analyse how human messages are interpreted by horses, how horses try to communicate with humans and how they communicate with each other. The practical format allows us to quickly browse through the dictionary and look for any kind of information: from training to riding, from intelligence to rearing, from half-breeds to gallop.

The authors -----

Francesco De Giorgio is an ethologist who has worked as a coach and a specialist in the relationship between humans and horses. Firm believer in an anthrozoological approach to horse-riding, he has created EquinSensExperience (ESE), an association with offices in Italy and abroad.

Valentina Mauriello is a veterinarian who has always loved horses and horse-riding. She has worked in Italy and in Ireland and has joined the ESE movement for an anthrozoological relationship between horses and humans.

Ester Corvi is a journalist with a great passion for animals and travelling.
